**EMPLOYEE  
NEWSLETTER**

**Josh Drummond**  
System Analyst  
IT Department  
Employee Since 2022

Josh’s fellow employee stated the following, “Josh is an excellent team player and always willing to come right over if an IT issue arises. Josh and Jesse have turned information technology in this city completely around from where we were. We have advanced decades as far as the technology we are able to implement because of their hard work. With Jesse gone now, the burden falls solely on Josh to keep things going and he has shown no signs of letting up even with a massively increased workload. Because of Josh and his work, my department alone has saved thousands in work that would have previously been contracted out.”

**Lauren Rogers**  
City Clerk  
Administration  
Employee Since 2023

Lauren’s fellow employee stated the following, “Lauren works long hours to make sure every board and committee runs smoothly. Lauren is fantastic. She works very hard to make sure every board and committee meeting goes off with out a hitch. She does a ton of behind the scenes work to make sure agendas get out on time. She works with every single department in the city to make things happen. She is a true rockstar!”

**Esker Davis**  
Crewman III  
Public Works  
Employee Since 2019

Esker’s fellow employee stated the following, “Esker is eager to help, always positive, goes above and beyond. Esker works well with all work groups within the city. When a fellow co-worker needed medical attention, Esker sprung to action to help his friend. He is always positive and shows pride in his work.”

# DEPARTMENT INITIATIVES

## PUBLIC WORKS

The Public Works Department has been exceptionally busy lately, focusing on several critical projects and urgent responses. Key among these is the Deegan Lake Environmental Cleanup, which aims to restore and protect the local ecosystem. In addition to this important environmental initiative, the department has been handling multiple after-hour emergency calls, addressing issues such as water main breaks to ensure community safety. Furthermore, the ongoing replacement and repair of water and sewer lines along Lawman Avenue highlights the department's commitment to upgrading aging infrastructure and improving service reliability for residents. Together, these efforts demonstrate the department's dedication to enhancing the community's quality of life and environmental health.
